

HD Supply, Repair and Remodel

No “quality fade” Policy

Effective 11-8-12, HD Supply, Repair and Remodel is implementing a no “quality fade” policy with all import manufactures, suppliers, and agents. The purpose of this policy is to prevent overall product quality degradation. This policy is to be enforced both retroactive and from the effective date noted above.

“Quality fade” is defined as: intentionally or unintentionally altering a product and or its packaging in any way not authorized by HDS RR.

If a manufacture, supplier, or agent is found altering a product and or its packaging from its original specification or approved production sample without HDS RR consent, HDS RR will take action. Action may include, but is not limited to: penalties, non- payment of goods, returning of goods at the manufacturers and or agents expense, and or possible termination.

Acknowledgement

I _____, as a representative of _____,
holding the title as _____, clearly acknowledge the policy in which HDS RR is
enforcing and its intent. By signing below, I understand that by altering a product and or its packaging
from its original specification or approved production sample without HDS RR consent, HDS RR may take
action as described above.
